PROJECTS

CineBook – Movie Booking App | *Spring Boot, React, Docker, Heroku, MySQL, JWT* Version 1.0.0 Deployed

- Built and deployed a full-stack movie booking platform with secure auth (JWT, OTP), password recovery, and mock payments.
- Used **React Redux** for efficient state management and reduced backend calls via single-mount data loading.
- Implemented role-based dashboards for Admin/Super Admin to manage movies, shows, seats, and users.
- Designed dynamic seat selection with real-time booking status and transactional integrity.
- Containerized backend with Docker, deployed to Heroku with config vars, health checks, and Swagger docs.
- Ongoing upgrades: Redis caching, microservices migration, and CI/CD automation.
